

Guidelines for Intensified Tuberculosis Case-finding and Isoniazid Preventive Therapy for People Living with HIV in Resource-constrained Settings

Author: World Health Organization

Publication Date: December 2010

Format: Guideline

Physical Description: 50 p.: mono.; refs., tables.

Language: English

Abstract:

The guidelines show how people with HIV can be protected from tuberculosis with regular, low-cost preventive medication. The guidelines present a set of recommendations that will help reduce TB disease in people living with HIV, their families and communities through a combination of screening for TB and provision of IPT.
