

## Assessing Tuberculosis Prevalence Through Population-Based Surveys

**Author:** World Health Organization (WHO) Regional Office for the Western Pacific

**Publication Date:** 2007

**Format:** Manual

**Physical Description:** 248 p.: col.: annexes, graphs, refs., tables.

**Language:** English

### Abstract:

This manual provides guidance on conducting cross-sectional surveys of TB disease. It is intended for TB experts and advisers at national and international levels and investigators involved in prevalence surveys. Data collected through standard methods in a well-defined study population can help in assessing the performance of TB control programmes, provide information for planning, and assess trends of the disease burden over time.
