

Integrating Collaborative TB and HIV Services within a Comprehensive Package of Care for People who Inject Drugs

Integrating Collaborative TB "and" HIV Services **Author:** World Health Organization

Publication Date: 2016

Format: Guideline

Physical Description: 56 p.: col.; refs.

Language: English

Abstract:

These guidelines aim to reduce morbidity and mortality related to TB and HIV-associated TB among people who inject drugs (PWID) through the integrated delivery of a comprehensive and holistic package of care. The guidelines provide an update of the 2008 Policy guidelines for collaborative TB and HIV services for injecting and other drug users: an integrated approach.
